EDUCATION

Higher Diploma in Computing & Software Engineering

ICBT Campus, Kandy — affiliated with Cardiff Metropolitan University

Currently pursuing | Student ID: KD/HDCSE/CMU/79/05

G.C.E. Advanced Level

Physical Science stream — 03 passes

Uva Science College, Badulla

G.C.E. Ordinary Level

09 passes

Uva Science College, Badulla

TECHNICAL SKILLS

- C#, ASP.NET Core, Java, C++
- REST APIs, JSON, JWT Auth
- JavaScript, HTML5 & CSS3
- PHP & MySQL
- SQL Server, MySQL
- Git & GitHub
- Visual Studio / Code, NetBeans
- Microsoft Project, Office 365

LANGUAGES

Tamil — Native

English — C2 (Listening/Reading/Writing), B1 Spoken

Sinhala — C2 (Listening/Reading), B1 Spoken

SOFT SKILLS

- Teamwork & collaboration
- Problem-solving
- Time management
- Critical thinking
- Communication & presenting
- Adaptability

RAJENDRAN GURUPRASHATH

Software Engineering Undergraduate | Aspiring .NET / Full-Stack Developer

PROFILE

Motivated Higher Diploma in Computing & Software Engineering undergraduate at ICBT Campus Kandy (Cardiff Metropolitan University), with hands-on experience building full-stack web applications, native Android apps, and desktop AI tools. Comfortable across the stack — from ASP.NET Core REST APIs and role-based JWT authentication to PHP/MySQL systems and Java-based mobile apps. Seeking an internship to apply and grow these skills in a professional software development environment.

PROJECTS

KMC Event Platform | *ASP.NET Core 10, C#, JWT Auth, SQL Server — Service-Oriented Computing Module*

- Built a two-project solution (API + Client) for a municipal council event management system, including a full event proposal and approval workflow.
- Implemented JWT-based authentication with three role tiers (Citizen, Organizer, Admin) and an Admin user management module.
- Designed a clean layered architecture (Model → DTO → Repository → AutoMapper Profiles → Controllers) for maintainability.
- Created a custom dark-themed UI ('Dusk Trail') with Orbitron/Rajdhani typography for a modern, distinctive front end.

PrintXpress | *Android, Java, Firebase — Mobile Application Development Module*

- Developed a native Android app for an on-demand digital printing service, covering the full assignment scope end-to-end.
- Integrated Firebase Firestore, Authentication, and Cloud Messaging (FCM) for real-time data sync and push notifications.

GlobeTrek Adventures | *PHP, MySQL, JavaScript (XHR)*

- Built a Sri Lanka travel booking platform with a live price-calculating customer booking flow and a custom payment system.
- Developed separate staff and admin dashboards with tab-based navigation and role-based, session-driven login.
- Designed a responsive dark-teal glassmorphism UI, tested across mobile and desktop.

Aira | *Python, PyQt5, Ollama (Llama 3.2)*

- Built a JARVIS-inspired desktop AI assistant with an animated HUD interface — orb visualizer, radar widget, and live waveform display.
- Connected a local LLM (Ollama/Llama 3.2) for offline conversational AI, plus real-time system monitoring via psutil.

SkillBridge.lk | *PHP/MySQL, PayHere & Stripe APIs, Session-Based Auth — Bilingual Freelancer Marketplace*

- Built a bilingual (English/Sinhala) freelancer marketplace with separate client, freelancer, and admin roles, each with session-driven authentication and a dedicated dashboard.
- Designed a relational schema covering users, freelancer profiles, service listings, bookings, payments, reviews, and messaging, and implemented in-app messaging and category-based freelancer search.
- Developed a full admin console: platform-wide statistics, a freelancer identity verification queue, user account management, and a refund request workflow with automatic flagging of overdue requests.
- Integrated dual payment gateways — PayHere for local LKR payments and Stripe for card payments — for end-to-end booking and payment processing.

KEY STRENGTHS

- Full-stack development across .NET, PHP, and Java/Android ecosystems
- REST API design, authentication & role-based access control
- Fast learner — picks up new frameworks and tools independently
- Strong eye for clean, modern UI/UX design
